Product Description

UHD 4K TV and High-Performance for Your Company s Requirements

Product Description:

Larger field of view: Compared with the traditional TV with a wider frame, the actual display area is relatively larger under the same size because the frame occupies less space.

Features:

- 1, intelligent system: usually run intelligent operating system, such as Android, etc., can be connected to the video platform through the network, online to watch a large number of movies and television, variety, animation and other content.
- 2, screen projection function: Support mobile phones, tablets and other devices wireless screen projection, easy to share photos, videos, documents and so on.
- 3, network interaction: some can connect to social networks, share viewing experience; Some TVS also support features such as online video calling (if equipped with a camera).
- 4, software update and download: can update the system through the network to improve performance and repair vulnerabilities, but also download a variety of applications, expand TV functions such as games, fitness, education, etc.
